

GLOBAL CAMPUS

The complete end-to-end campus management solution

Global Campus

Global Campus:

The SIS - Academic Management Solution

Global Campus is a web-based student information system designed to meet the unique needs of medium and large K-12 schools. It is composed of a bouquet of services that address every single activity in schools.

From reception to Alumni, Global Campus has it all.

The solution is an extremely reliable and flexible set of modules that are shaped to accommodate the unique needs of schools. We, at Global Horizons, know that no two implementations look the same and special care should be taken to fully analyze the needs of the school; our solution was engineered in a way that planning, adaptation, deployment, implementation, migration, and integration should require minimum intervention from the supplier and that our tools should adapt and follow the client needs and not vice versa. This is why, Global Campus is so dynamic and flexible to the point that users can customize and create their own applications forms, data entry screens, and last but not least, create and generate custom reports.

Inquiry and Enrollment

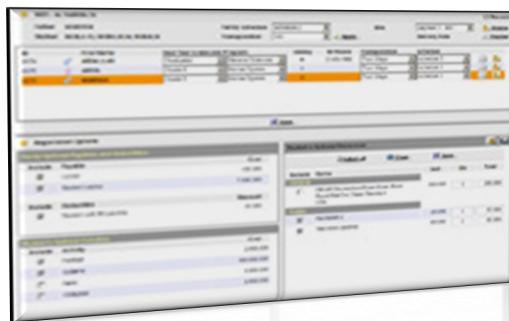

Log all the inquiries you are receiving.

This innovative service will allow your enrollments officers to review future enrollments within the school's definable enrollment stages and then make changes or adjustments.

This service is integrated with global gate where new parents can submit their application form online.

It also provides a detailed analysis of future years' enrolment numbers by combining 'continuing' student numbers with confirmed new enrollments. This becomes a reliable tool for the business manager to evaluate and study actual against expected occupancies.

Use email and/or SMS to communicate with parents during the enrollment process.

the parents and/or the students can choose from. The registration can be performed online through the Global Gate Service, through tablets, or directly through the system.

Make your choice then retrieve a handful of important documents ranging from invoices, receipts, delivery notes, and others.

Most importantly, plan, forecast, and generate your next year POs through the forecast report that you can consult by a click of a button

Registration

Registration and Bulk Invoicing

Once your registration is started, Parents and students can enjoy a multitude of services to complete their registration online. The flexible and parameterized registration setup will allow you to define beforehand the compulsory registration items as well as the various optional items

Details

Details Module

The Details Module maintains the data records of Parents, Students, Courses, Teachers, and Staff. This module enables you to store all personal, academic, professional and history data regarding a student, his/her parents, and his/her siblings. It is also used to create the courses for a specific grade and program, setup the report card and marking structure, define skill based evaluations criteria, set timetable related parameters, and others.

Staff personal details are inherited from Global HR and academic related data is rendered available for access by academicians and curriculum planners.

The Details module can be adapted to your needs as all data groups, data entry forms, and reports can be customized by the user and saved for any later access.

Attendance

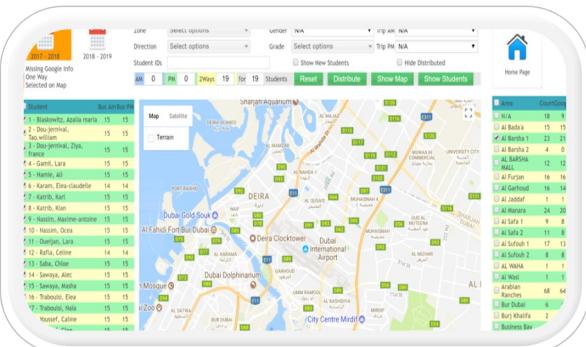

The attendance module helps track students' attendance. It maintains the attendance electronically with the facility to customize the process. The attendance module features a new way to log in attendance through the use of electronic hand held devices like Pocket PC's. The module offers a variety of reports to show attendance records. Schools may define a set of Attendance Exception Rules against which students are automatically evaluated.

Attendance can be recorded by period or daily with rules to link the period attendance occurrences to the daily attendance.

Parents and students can be notified through SMS to their kids' attendance status.

Transportation

The transportation module is designed to ensure complete control over the school's fleet of buses. This module features bus stop & route allocation to student/staff, number of students on each stop/route, number of stops on each route. Student distribution over bus routes, overfill and capacity of vehicles, rosters in various format whether by driver, by supervisor or by class can be managed.

Timetable

The timetable module has been designed to simplify the most time consuming task in a school, the creation of a timetable. The timetable module features manual generation of class/teacher/room timetables and provisions for a teacher substitution list for absent teachers, a list of teachers teaching a particular subject for a class/all classes, and a list of all class teachers. The information is also presented in various report formats.

The timetable allows two teacher to share a single room and a single course to be distributed to 2 teachers and 2 separate rooms.

Global Horizons

EMR

Medical Records

EMR typically refers to a student's healthcare information and profile. The medical record for each student includes:

Emergency Contact Information, School Medical Data, Medical Conditions, Immunization Details, Emergency contacts, Illness History, Supplementary Information, Management Information,

and Notes with attachments.

The Medical Alert system warns your staff of student specific conditions or illnesses when accessing records .

The screenshot shows a software interface for managing student medical records. On the left, there is a detailed form for a student named 'Abdul Raheem' with fields for Name, Date of Birth, Gender, Address, and various medical details. On the right, a list of students is displayed with their names, grades, and contact information. A red box highlights a section of the list where several students are marked as having 'Medical Alert'. Below the list, a message from the system states: 'Medical Alert: When in doubt, always take care of the student. If you have any concerns about a student's health, please contact the school nurse or doctor.' At the bottom, there is a note about the system being used for 'Healthcare'.

Calendar

Off days/Events

The Calendar service caters for daily activities and events. The Calendar is fully integrated with Global Gate. Homework, class work, extracurricular activities and many more can be logged into the system and communicated to the students, parents, teachers, and community.

Among others, the Calendar can be used to communicate personal messages to any entity of Global Campus whether it is a single student, teacher, parent, or a group or cycle.

September 2017						
Su	Mo	Tu	We	Th	Fr	Sa

The screenshot shows a software interface for Individual Education Planning (IEP). At the top, there is a search bar for 'Student ID' and 'Type of Need' (set to 'N/A'). Below this is a table of student records. The main area displays a student's profile for 'ABDUL RAHEEM' with sections for 'SEN details', 'Type of Need' (checkboxes for Behavioral Social Emotional, Physical Disability, Speech and Language Disorders, and Talented), 'General Learning Difficulties' (checkboxes for Learning Difficulty 1, PMLD, and Specific Learning Difficulties like Dyslexia and Dyscalculia), and 'Specific Learning Difficulties' (checkboxes for Dyslexia - Reading and Dyscalculia - Using Number). There is also a 'Medical Alert' section and a 'Save' button. At the bottom, there is a summary table for 'IEP for ABDUL RAHEEM' with columns for 'Area of N/A', 'Subarea of Concern', 'Target', 'Key Staff', and 'Parent Consent'.

IEP WRITER

Individual Education Plans and Learning Plans

With our IEP writer you can use our statement bank to rapidly create IEPs or Learning Plans.

Writing IEPs or Learning Plans is an essential step towards supporting pupils with special or additional needs. They provide a concise summary of the issues faced by the child and the strategies schools put in place to address these. Our IEP Writer system provides a quick and easy way to write Learning Plans of any type and comes pre packed with a large statement bank, written by experienced education professionals.

Specialized Dashboards

Quick tools to remain in control

Global Horizons

The Dashboards bring everything together in one place based on the user's position and responsibilities. Schools are under increased pressure to create detailed strategic goals to improve staff, facility and student performance. Global Campus Dashboards help users to monitor, evaluate and improve these goals. While administrators are often a primary audience, you can also share these dashboards to any of your staff members – even if your audience has no experience with data analysis.

My Dashboard:

With so many constituents, stakeholders and responsibilities, it can be overwhelming for schools' principals, trying to provide and preserve quality of education, to monitor and analyze daily operations on campus. With My Dashboards, you can quickly be briefed on how your students, staff, and school is doing day by day. Monitor the daily work of your staff, analyzing performance, generating all sorts of statistical data and, last but not least, responding to needs and requests based on data and results is at your fingertip with a click of a button.

Head of Departments / Coordinators:

Ensure high standards of teaching and learning practice and processes while being informed by the HOD Dashboard. Following up on curriculum delivery, monitoring students' and teachers' performance within a subject or department, could not be easier. The HOD dashboard helps the user understand his/her stakeholders and provide all sort of monitoring, analysis, and coordination tools in the objective of fulfilling the department's objectives.

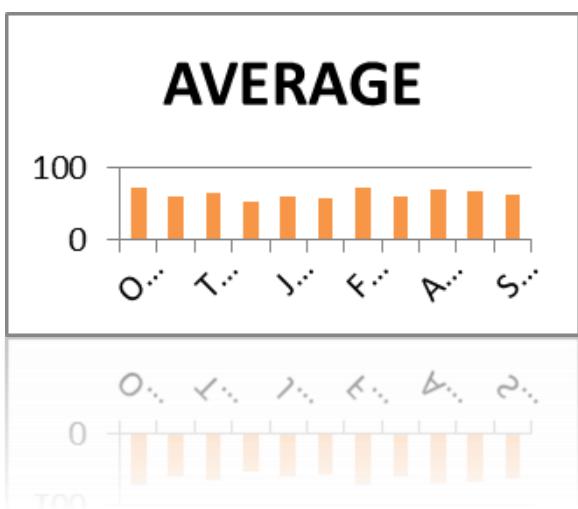

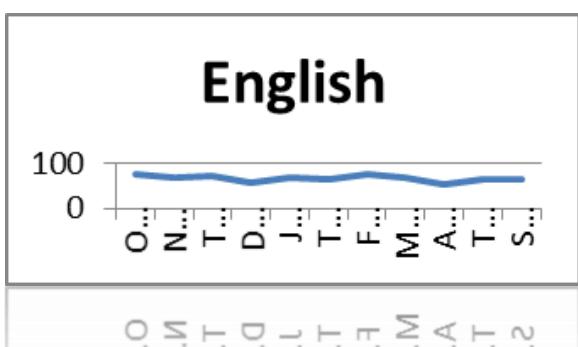

Supervisors:

While the above dashboards are concerned with groups and teachers, the Supervisor Dashboard focuses on individual students. Locate a student and depict all his/her academic, behavioral, and performance details in one centralized space. Answering parents or concerned parties on any aspect related to a student cannot be easier.

The image displays three separate screenshots of specialized dashboards, each showing a different perspective on school data management:

- My Dashboard:** This dashboard is designed for school administrators. It features a grid of 16 icons representing various school metrics and functions. Below the grid, there are sections for "My Portfolio" (student distribution by gender and year), "Teachers in my Group" (a list of 213 teachers with their names and ID numbers), and "Attendance totals" (a summary table for staff and students).
- Head of Departments / Coordinators:** This dashboard is tailored for department heads or coordinators. It includes a grid of icons for tasks like "Staff Attendance," "Students' Attendance," and "Timetables." A prominent feature is a "Attendance totals" section with a bar chart showing staff presence (100.0% - 0 out of 349) and student presence (100.0% - 0 out of 3114). Below this is a "Attendance Watching On 07/11/2015" section with a timeline showing student attendance status across seven periods.
- Supervisors:** This dashboard focuses on individual student monitoring. It shows a grid of icons for "Academics" and "Birthdays." A large section titled "Attendance Watchlist On 07/11/2015" displays a timeline of student attendance for Period 1 through Period 7, with specific student names like NAFILA and HAFIZA listed.

The Teachers' Lounge is a revolutionary classroom management solution designed to meet the evolving needs of today's educator with unparalleled ease-of-use. A wide array of functions to facilitate differentiated instruction, formative assessment, all within an elegant user interface designed to ignite widespread and enthusiastic end-user adoption. It is designed to allow educators to assess their students' progress from many different angles in order to maximize student achievement.

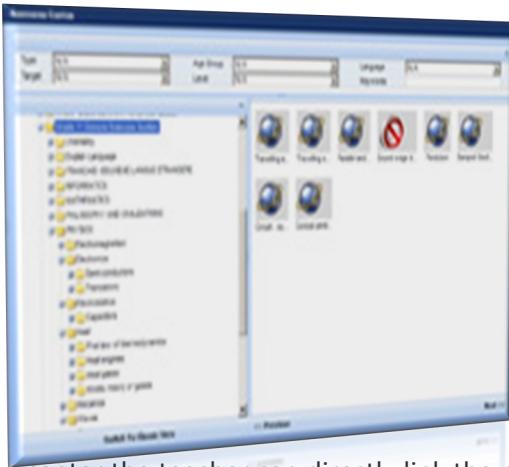

With the teachers' lounge, teachers can create their own point and credit tables along with their personal comments banks. Linking a mark to a comment and representing it in a color can only help the teacher to read the progress of the student just by watching at the color spectrum. Identifying students who would need a push or some extra attention is only locating a specified color.

The Assignments Book will allow teachers to electronically design their grading book and plan their assignment grading method from a variety of methods. Whether a Total Sum, an Average, or a Weighted average, the teacher will not but be pleased with the flexibility this module offers to him. Freedom is another aspect of the assignments module as it will give the teacher the choice to weigh his/her students' work and decide what would be the most representative final grade to send to school for the distributed report card. Marks are good in evaluating the knowledge of a student in a certain subject; but are they enough to evaluate the acquired skills? This is why the skills reporting module is a comprehensive tool that will record and evaluate the skill acquired by the student over time for a specific subject. The evaluation becomes qualitative instead of quantitative and this method cannot but help the teacher evaluate the real progress in acquiring any specific skill. Last but not least, the teacher will have access to handful of useful reports, graphs, and statistics that would help him evaluate his/her grade distribution and make decision about his/her own performance.

Marks distribution and weighting play an important role in evaluating and mainly orienting a student to his/her future career. Creating different scenarios of subjects' weight distribution cannot but help the advisor and the counselor identify the subject that the student is at ease with or the ones where he/she might need assistance and skill development .

TRC

Teachers' Resource Center

center the teacher can directly link the resource to his/her lesson plan and save a copy within the resource center and archive it using a set of keywords and classification criteria that will render finding, sharing, and storing the resource so easy.

Along with a detailed curriculum and other keywords classifications, Global Horizons has developed and gathered a series of resources ranging from animations, simulations, PowerPoint presentations and others. The teacher will be able to locate all sort of resources to be used in the classroom; and when coupled with an interactive board and other multimedia setups, the Teacher Resource Center will render the learning experience more enjoyable and more productive .

Planning is always BETTER

Teachers' Lesson Planner

No more emailing files back and forth or juggling dozens of Google Doc files. With teachers' lesson planner, you will stay more organized, prepared, and planned so that you can raise students' achievement.

Easily create your lesson plan, copy it, edit it, share it with your colleague, and retrieve it any time you need it.

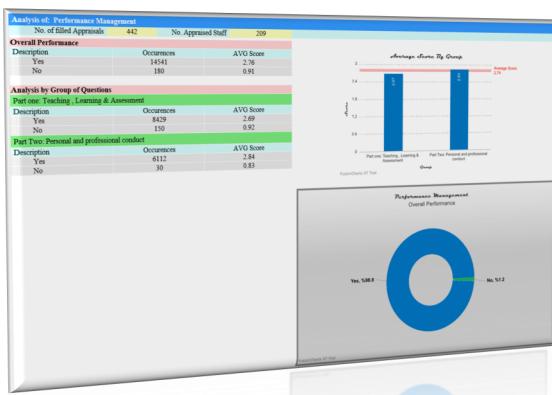

Use the template provided in the lesson planner to plan faster and upload any attachments,

Fail to Plan = Plan to Fail

Staff Appraisal

With Staff Appraisal, you can create your own customized set or sets of appraisal forms to evaluate performance of your staff. Generate several reports to analyze the results and view them in different format. Share and print your reports.

ERP

applications**

**extra
flexibility
on many
aspects**

General Ledger

The accounts structure or Chart of Accounts is an extremely flexible tree structure that allows the user to plan and adapt the system to its line of business and business objectives. The tree structure can virtually extend indefinitely making it possible to go into any financial detail. Moreover, the general ledger provides you with the possibility to create, distribute, manage and track your budgets over the various accounts with the option to block any transaction that will exceed the assigned budget. It also allows you to observe the activity in any account at any given time.

Accounts Payable

Accounts Payable module provides a comprehensive solution for managing expenditures. Beyond recording transactions and obligations to vendors and creditors, the informative financial reports include payables aging and future cash requirements information required

Human Capital Management:

supports comprehensive applications in human resources management from basic staff record handling to complex administrative payroll and benefits functions in a new revolutionary interface.

Standardizing your payroll process and aligning your remunerations is a vital requirement in any organization in order to better evaluate and satisfy your personnel. A salary matrix provides one aspect of the solution but is definitely not sufficient in the evaluation process. Being able to efficiently plan data changes, report data and monitor their changes over intervals of time is the key in reaching these objectives.

Global ERP is a fully integrated solution that fulfills the core business needs of small and midsize organizations across all industries and market sectors. It is composed of several modules; each module providing some functionalities and services to make your environment more professional, controlled, and integrated. It provides you with tools and indicators that will help you have a better understanding and evaluation of your entire business.

General Accounting:

The General Accounting service has been designed to perform the standard accounting functionalities with some extra flexibility on many aspects to make it easier to integrate and adapt to any business financial requirements.

Accounts Receivable

The General Accounting service has been designed to perform the standard accounting functionalities with some extra flexibility on many aspects to make it easier to integrate and adapt to any business financial requirements.

« a robust and adaptable solution that supports comprehensive applications in human resources management »

main features!

The Salary Sheet generated by the payroll system helps the accounts department in distribution of monthly salaries to the employees in the organization. The HR and Payroll modules features can easily be extended by considering other compatible and 100% integrated Front Desk components from Global

- ◆ Maintains records of the various components of salary
- ◆ Categories the salary components on the basis of allowances/deductions
- ◆ Generates Salary Sheet and Salary Slip of all employees
- ◆ Generates various important reports reducing paperwork in the organization
- ◆ Generation of reports in desired formats
- ◆ Export of reports in various formats such as RTF, HTML, Excel, Lotus, Word Document,
- ◆ etc.
- ◆ Emailing of generated reports from the application itself.
- ◆ Ad-hoc SMS and E-mail notifications
- ◆ The Online Service Desk is a key feature as it transforms the HR and payroll departments to important staff service centers. It also reduces the load of work
- ◆ as it organizes data inputs and delivery between these departments and corresponding staff.

The Salary Sheet generated by the payroll system helps the accounts department in distribution of monthly salaries to the employees in the organization.

Online Service Desk the organization can provide the:

- ◆ Ability to assign access to employees to the Online Service Desk by providing them with username and passwords and defining corresponding access privileges.
- ◆ Ability for employees to request leaves, vacations, documents, and certificates online.
- ◆ Ability for managers to approve leaves for employees through the service.
- ◆ Ability to check sick days, vacation balances, etc. through the Web.
- ◆ Ability for employees to review job openings / position requisitions through the Web.
- ◆ Ability to change employee information (e.g. home phone number, address, room number, internal phone extension, etc.) through the Web.
- ◆ Ability to have information changes / updates reviewed by HR staff prior to application to system.
- ◆ Ability to update educational qualifications through Web.
- ◆ Ability for employees to see their pay statement on the Web

Global Gate

There has been much discussion on the benefits of student information systems and how they have given educators the opportunity to receive and communicate targeted and comprehensive information in real-time, allowing the focus to be placed on student achievement. And while today's educators can customize their student information system with tools that enable data analysis and enhance student assessment, they also have the potential to build a collaborative environment for another critical stakeholder in the education process: parents.

The classroom landscape is changing and the increased communication between parents, students and teachers is impacting student achievement in new ways. Whether inside or outside the classroom, online access to schedules, grades, homework, and attendance information makes it easy for parents and teachers to stay in close contact with student progress.

The Global Gate Service consists of 4 Pages, each of them can be planned and designed by the user through the multi-tier admin module of Global Gate.

Home Page: You can select from a range of pre-defined services covering at least the following functions:

Login Box with Anti Spam Security feature

Global Library

The ultimate solution for your library management

Global library is an Easy-to-use and fully featured library management module for schools. Global Library is integrated with Global Campus, making the management of patrons easier and seamless. Global library allows librarians and administrators keep thorough, real-time track of a library's inventory and media assets, but also gives patrons direct access and discovery of the collections.

Global Library is web-based and can be accessed from any web browser and can be linked to any service. Among other services, Global Library provides easy-to-use bar-coding, circulation, cataloging, and reporting capabilities.

Moodle

The de-facto standard of LMS

Moodle, an open platform, has become the de-facto standard of Learning Management solutions. Global Campus has been integrated with Moodle to allow educators take advantage of the various features. Moodle is free and has an extensive library of training resources and references. Educators across the word have been exposed to the platform, rendering it The choice for LMS platforms.

Integreat

With over 15 thousands of users, Global Campus is the best-on-campus, robust platform in the Middle East, designed to streamline school operations, provide valuable insights into operations and classroom performance, empower teachers, and drive student growth. Remove inefficiencies in school operations and free-up human resources. Spend more time on instruction with our services.

What is it about?

With tens of thousands of users, Integreat Mobile App is now an additional service that plugs into Global Campus, the robust platform designed to streamline school operations.

Integreat is an additional service geared to Parent Engagement through real-time student performance updates and convenient communication tools. Integreat helps parents with a suite of tools to monitor student progress and communicate with teachers. Real-time notifications alert parents to important class announcements and reminders. Interactive calendars provide a big-picture view of student workloads, meaning parents can help students stay on track and manage their time. Parents can easily access important services like homework, assessment, attendance, and private communication channels enable one-on-one correspondence with teachers to discuss student progress and growth.

Features

Why Global Campus?

	Totally Web-based
	Global Campus is totally web based and only requires an internet connection and a web browser (Windows Explorer 7 and above are recommended) to run.
	Easy to Use
	Simple clicks and drag and drop are the base of most of the tasks and operations.
	Multi-lingual
	Global Campus supports all Latin and Middle Eastern languages on the data level and its interface is available in Arabic, English, and French. Translating the interface to another language is only a matter of translating few text files. It also supports Hijri dates.
	Open System
	The service is based on open database architecture. Data can be easily imported and exported through the smart Import/Export function.
	Highly Secure
	The security in Global Campus is extremely high and multi-tier. It applies to all system, data and networking level: The system is protected by firewalls and security access schema; Data is encrypted using the latest available techniques; VPN connections are available for clients who want to have their private networking.
	Structured grouping
	The service allows you to create your own tree like structure of virtually unlimited data groups of your entities under one or more branches so that you can easily manage them.
	Customizable Data Structure
	Create your own data groups and fields. Global Campus includes all of your data structures in all its functions so that you can make use of them.
	Customizable Search
	In addition to the Quick and alphabetical search engines, the Advanced Search function of Global Campus allows you to add unlimited fields to your search operation and link them with logical operators. Drag and drop your search result group to your contacts tree and your search results are saved.
	Integrated Email and SMS
	Global Campus gives you the possibility to use your own E-mail server or use the integrated e-mail server to send e-mail. Any generated built-in or custom reports can be directly exported to Word, Excel, PDF or directly emailed from the application itself. Moreover, personalized SMS can be directly sent from the various services. The e-mail and the SMS manager includes pre-designed templates library that you can easily expand, use and modify.
	Detailed Reports and Logs
	Global Campus creates logs for all your communications so that you can track them and review them at any time. It can be used as your personal document management solution. It grants you the possibility of grouping, classifying, and organizing your documents and link them to any entity. A document can be of any type and can be assigned keywords for better and optimized retrieval.
